## Transformation and Survival

### Earth's Timeline (Human Habitation)

- **December 21, 2007** – The destruction has already started; it just has not reached us yet. Two (2) galaxies have run into each other (bad/chaos), damage still to come.
- **December 21, 2012** – Solar flares melt metal in the earth, the earth turns 45° and is destroyed (Mayan and Chinese calendars).
- **June, 2012** – Black Hole Alignment – wobbles the Earth.
- **August, 2012** – Our entire solar system appears to be moving into a dangerous Inter-Stellar Energy Cloud (Russian Geophysicist Dmitriev, Shockwave – Lawrence E. Joseph.)
- **January 1, 2020** – Wave from spills over energy.
- **January, 2025** – Bacteria breaks down oceans water into H's and O's. The H's released will cause total destruction.
- **April 13, 2029** – An asteroid named 99942 Apophis, could hit the earth (NASA & JPL).
- **April 13, 2036** – Asteroid 99942 Apophis may hit the earth on second time around, if a no hit on April 13, 2029.
- **January, 2046** – Solar Flares (Russian Scientist).
- **January, 2050** – No fish left in the oceans.
- **May, 2075** – Earth wobbling in orbits (VP Al Gore and other scientists).
- **January, 2080** – Earth is hot, global warming, all planets hot - Sun (CBN)
- **June, 2086** – Earth's loss of magnetism, so low that atmosphere is blown away by solar winds (USGS). Magnetic declination moving to the West.
- **February, 2092** – Sylvia Brown – End of mankind.
- **January, 2200** – Earth is in dark space by itself (Dr. M.D.B. & US Astronomers).

## Agreement of Scientists and Others

When disparate cultures and disciplines come together in fundamental agreement that dramatic, deadly change is on the way, it is only prudent to pay heed and move forward together to prepare ourselves, our loved ones and whatever fraction of the greater world we might be able to influence, for the coming events.

## Major Transformation

My event is about a major transformation that may entail a great number of deaths, human and otherwise, but unlike most of the doomsday cults, this is nothing that advocates death as a means to transcendence or anything else.

## Survival

Human and animal habitation of the earth will end with the events listed on the Earth's Timeline schedule. We need to move the population of the earth, 90%, and souls into another place where civilization can continue to exist. We can make this possible with the properties of our compounds APM and SCM. Humans need to ingest APM as a precursor to the transformation. APM needs to be in the human cell structure.

## Conditions for Transformation

1. APM – Our bodies need APM to build our neurons and cells into a quantum state. (Bi-location property)
2. PH-7 – Our cells and body need a PH of 7 for free electron flow. Our bodies can be easily tested and changed to a PH of 7 with fruit or antacids.
3. Sleep State – Use monitoring equipment and hypnosis.
4. Time – 2 a.m. to 4 a.m.
5. System I – Brain does not sleep, it just changes states.
6. System II – Mental powers, channeling of energy (attached and unattached), brain energy is concentrated. Astro Projection, mental teleportation, moving mass with mental powers, Astral Projection. People have done Astro Projection in the past without APM.
7. Paranormal books, writers, and information show Astro Projection, mental telepathy (US Gov. and Russian Gov. during Cold War), teleportation, and bi-location. (Barnes & Noble, Borders)

## Bacteria

Bacteria has the probability to break the H<sub>2</sub>O in the oceans apart and releasing H's and O's into the atmosphere and leave no water. H's would cause havoc to our planet. This could also be a threat at any time. The release of H's is also produced by oxygen generating equipment.

## Inter-Stellar Energy Field

We are pushing a wave front on the edge of our universe. Some of this energy is spilling over into our universe. We can be hit by the energy forms we are encountering at any time.

## Influence of the Event

On my timeline, all of the events listed are being influenced by the event which has already happened. Two (2) galaxies have run into each other causing untold damage and bad consequences. Possibly upset all of the stars and the universes which are still in existence, and are starting to implode, causing black holes.

Since astronomers have seen the two (2) universes and the collision of two (2) other planets and a planet turning into a black hole, indicates that the destruction from these events are close enough to affect our own environment. It is very close in time since it can be observed from the earth.

The two (2) universes colliding is causing the events listed on my timeline.

## Status of the Universes

Our universe, stars and space, is much smaller than it looks. Most of the stars have been destroyed, and only a small amount of energy and mass still exist in this universe. We only see the light from outer space which has already been destroyed. The dark energy and mass has folded to "O" in a quantum state. The destruction (event) has already happened. My timeline is correct. Since the destruction has already happened, there is plenty of space for our new negative universe in a quantum state. It will be easy to transform in a quantum state (bi-location).

## Solutions Most Important to Everything

- APM – (All-Purpose Medicine): Quantum state material in the neurons and basic building block of each and every quantum cell.
- Braneworlds<sup>2</sup>, parallel, and alternate universes are in the "**same space as we are**". They occupy about ninety-five percent (95%) of the space and we only see about

five percent (5%) of the space and matter around us.

- We continuously get glimpses of the rest of the areas and these other places.
- Also in a resting state we operate in these other areas in what we call REM or dreams.
- It all travels with us due to the distribution of the string energy (open-ended) in space.

## Neurons / String Energy

Our universe is moving into a very high dense area of string energy in space. This will make it easier for our neurons in a quantum state to interact with the energy in the Parallel Universe, Braneworlds, and space to accomplish a transition when one of, or any of the catastrophic events take place, as outlined on our Earth's Timeline.

Neurons are the vehicle with string energy which will enable the transition. APM and SCM oscillate in a quantum state. All string energy oscillates.

We will utilize unattached string energy to accomplish what we need to continue our form of species and civilization. With open-ended string energy we can form it into any type of matter or any other thing by attaching it to the form of branes.

## Quantum Solutions

Our quantum state neurons with APM, connect up to open-ended string energy which connects in a series to our parallel Quantum Universes (Braneworlds or a mass of string energy).

Our neurons and the quantum mass are in direct contact (all part of the same entity). Therefore, we can move freely through the Braneworlds and here. It is all of the same matter.

The brain neurons project energy and images which are real or can become real in our confines of space and this reality. Our brain neurons work continuously all of the time. Therefore our dreams or their reality is real in one universe or another - Quantum or Braneworlds.

Neurons are made up like, and with the same mass structure as the Braneworlds. Neuron types are integrated into all types of matter.

All matter has a structure of grains, rods or other types of spikes or configurations, like all neurons and Braneworlds.

## Realities in Quantum State

Our quantum reality is just beneath, outside, or closely attached to the reality in which we exist in now.

They both can become entwined with ripples in the surrounding areas, just like waves in water and in the ocean.

The Quantum Universes are real close to us. We do not have to travel any distances.

With the bi-location properties of APM in our cells and neurons, we can exist in both of these realities, plus more Braneworlds at the same time.

## Solution for Bi-Location

The quantum state and bi-location can be achieved by larger amounts of APM injected into the body. The more APM, the more material to put into the "space" with the waveform coherence.

Waveform / Wave Function is for APM (material). APM is in a quantum state. With APM in the cells, it puts the cells into a quantum state. With the waveform / wave function of APM operating between 0 and 0.005 sec., the cells can be placed into the quantum state with bi-location properties at any place in space.

## Waveform / Quantum State

With the waveform collapsing to "0" every 0.005 sec., the time in space, or matter to exist in the quantum state may multiple universes, will repeat every 0.005 of a sec., and will probably hold in the quantum state as soon as the waveform is expanded. Then it will reunite to its zero form, which does not disappear. It just drops out of a quantum state, but rebuilds right back.

## Waveform

Quantum mechanics: The theory that is based on the assumption that "all matter" consists of discrete elementary particles that have "associated wave functions".

Wave Function: A quantum mechanical function that determines the relative likelihood of the corresponding object being at any point in space.

Wave function insures that particles will be in the same quantum state and place, at the same time.

## Time Travel - Realities in Quantum State

Our quantum reality is just beneath, outside, or closely attached to the reality in which we exist in now. They both can become entwined with ripples in the surrounding areas, just like waves in water and in the ocean.

The Quantum Universes are real close to us. We do not have to travel any distances.

With the bi-location properties of APM in our cells and neurons, we can exist in both of these realities, plus more Braneworlds at the same time.

When we utilize the quantum state bi-location, we will be able to travel anywhere we want to, that is environmentally friendly to our forms and where we can survive.

Energy is a string open-ended and also in a closed loop. Time is forward, not looped. We can travel into the future but not into the past. We build a system utilizing the looped energy and get the system going round and round. We could get history to repeat itself. This will still not let us travel into the past, just repeat events.

In a quantum state there are many things which are different and new to most of our civilization. Some of these things are as follows:

- ❖ Universes, Atmospheres, Materials, Metals, Dimensions, Colors, Sounds, Food, Senses, Intelligence, Knowledge, State of Beings, Travel, Energy and many others.

## New Universe

Our "new" negative universe will be small and in a negative charge (planck scale). We will exist in an energy (electrical form) as open ended string energy. The unified quantum theory will be accepted as the prevalent string theory (open-end energy). With stars and galaxies disintegrating, energy is reverted back to string energy and can be attached to new branes in other dimensional universes. Matter is rearranged. Energy is moving.

APM (quantum state material) will be readily available in our new negative universe which is also in a quantum state. People will be able to retain a negative voltage charge in their bodies because of the -24VDC quantum state. It will be easier for a "disease free" eternal life.

## Quantum State Containers

We encase containers with APM and SCM (same) completely. We fill the containers with what we need or with people, and the enclosed containers become in a quantum state because it is enclosed with quantum state material. This material has bi-location and levitation properties, plus all of the other properties. We can take what we need.

With the penetrating properties through steel, we can encase and secure the APM/SCM around the containers.

Another viable option for people, animals or other life forms, is to fill a space suit with APM/SCM. This will put the suit into a quantum state and therefore, anything inside the suit will be passed into a quantum state.

We now have the vehicle for people and materials and everything which we may need.

## Final Purpose

The overall view and purpose of our research and work is to move our group, the 90%, and as much of civilization as we can transport, to the new place, to save civilization. We have all that we need at the present time – APM, SCM and our power. We have all of the science to back up our conclusions.

Our planet (Earth) and the other planets around our sun are getting warmer because of the sun's activity, and the flares coming from it. This means Global Warming is caused by the sun. NASA is running six (6) missions around the sun monitoring its activity. Five thousand scientists are working on the problem of the sun's solar flares melting the metal in the Earth and mantel. The Earth would be too hot to exist and also it would turn on its side and then go out of its orbits – six (6) orbits. Their book is available at Barnes & Noble (June, 2008).|

## Timeline Event Clause

*Let us state, that if the events on our earth's timeline do not occur, the life on earth will continue, but we will still have APM with its properties alone will be able to travel to the other universes in the quantum state (small) and the relativity state (large). It will open up our knowledge base to new levels. - Bunnell Industries*

## Glossary\*

<sup>1</sup>**Brane** A membrane-like object in higher-dimensional space that can carry energy and confine particles and forces.

<sup>2</sup>**Braneworld** A physical setup in which matter and forces are confined to branes<sup>1</sup>.

\*Lisa Randall, "Glossary," *Warped Passages-Unraveling the Mysteries of the Universe's Hidden Dimensions*
